

والتش الذهب 1000 GOLD MONSTER 1000

Fully automatic detector for ultra-efficient gold recovery!

- Extra sensitive 45 kHz performance
- 2 search coils included
- Waterproof design*
- Easy quick start
- Universal shaft adapter

VLF ♂

World's Best Metal Detection Technologies

MINELAB

"I was able to find nine small nuggets (flakes) so easily that it was a bit surprising! Total weight of all nine is 7.8 grains. None were deep, maybe 3–4 cm at most. Just enough however to be just out of reach of the SDC and too small for the GPZ."

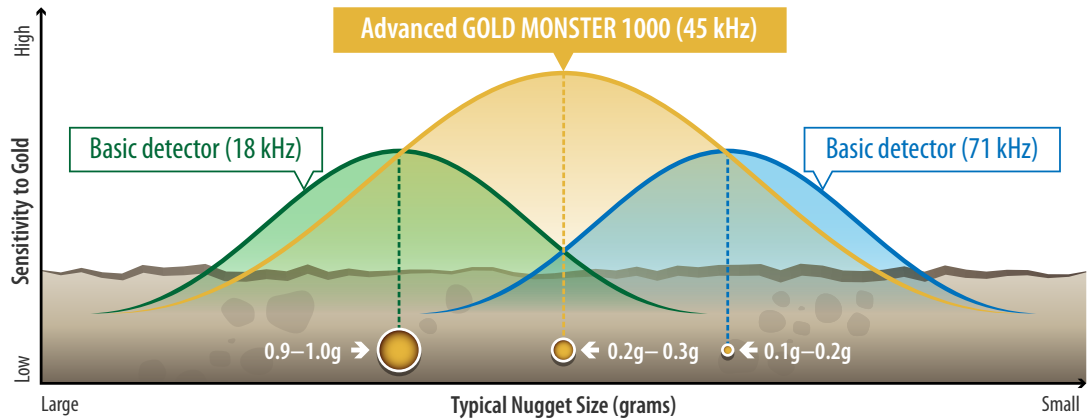

Field Tester, NV, USA

GOLD MONSTER 1000 outperforms all other single frequency VLF gold detectors!

Up until now, there has always been a compromise between frequency and sensitivity when optimising detector performance, because lower frequencies are more sensitive to larger gold nuggets and higher frequencies are more sensitive to smaller gold nuggets...

When comparing detectors, the three curves in the diagram represent each detector's ability to find small gold nuggets of a certain size, at a maximum possible depth. Most detectors will find a very large nugget just beneath the surface, however a detector's sensitivity to gold determines how many smaller nuggets will ultimately be recovered in difficult (noisy) ground at greater depths.

Detector sensitivity comparisons are representative only. Actual performance will depend upon nugget size, detector settings and ground conditions.

An 18 kHz detector will normally have a depth advantage on nuggets $\geq 1.0g$ over a basic mid-frequency detector, and a 71 kHz detector will have a depth advantage on nuggets $\leq 0.1g$. The advanced GOLD MONSTER 1000 uses an intermediate 45 kHz frequency AND a high speed 24-bit signal processor. This primary combination greatly boosts sensitivity to gold beyond that of other single frequency VLF detectors over a wide range of nugget sizes, without introducing excess noise and false signals.

The GOLD MONSTER 1000 also has improved ferrous/non-ferrous discrimination and copes better with conductive (salty) soils than higher frequency detectors, making it the perfect choice to maximize your gold recovery!

Auto noise cancel • Digital electronics • Auto ground balance • Faster processor • Auto sensitivity

1. Gold Chance Indicator

2. Detect Modes

Detect Modes	Gold (Iron reject), Deep All-Metal
Discrimination	Gold Chance Indicator (high/low)
Ground Balance	Automatic (Easy-Trak)
Noise Cancel	Automatic (On start-up)
Sensitivity Adjust	Manual (1–10), Auto (11), Auto + (12)
Volume Adjust	Manual 1–6
Display	Monochrome LCD
Detector Length	54.4"–37.2" (1382mm–944mm)
Detector Weight (with 10" x 6" coil)	2.94lbs (1.33kg) (excluding battery)
Audio Output	Internal speaker or headphones 1/8" (3.5mm)
Coils (standard)	GM10 (10" x 6" Double-D), GM05 (5" Double-D)
* Waterproof/Splash proof	Coils waterproof to 3' (1m), Control box rain/splash proof
Battery Options	Li-Ion (included), 8 x AA Batteries (not included)
Key Technology	Ultra-wide dynamic range 45 kHz VLF

3. Sensitivity Options

4. Adjustable Volume
